SUMMARY

Aspiring Software Engineer with strong problem-solving skills and consistent practice in Data Structures and Algorithms, demonstrated by solving 200+ LeetCode problems. Passionate about building scalable applications and continuously improving technical expertise to excel in full-stack development.

TECHNICAL SKILLS

Programming Languages:

C,CPP,Java,Javascript

Tool & Technologies:

git,bash,vs code ,Ocean

POWER SKILLS

- Fast Learner & Adaptable to New Technologies
- Strong Problem-Solving Ability
- Effective Communication & Team Collaboration
- Consistent Learning Mindset, Ready to Take on Challenges

EDUCATION

- Bachelor of Technology | CSE |
- Lovely Professional University
- Phagwara,IN

AUG'23-JULY '27

PROJECT

1. E-commerce Website (Apni dukan)

- Individually built a full-stack e-commerce website with product listing, cart, and checkout functionality.
- Implemented backend APIs using Express.js and MongoDB for product and user data management.
- Integrated state management for cart operations and dynamic product rendering.
- Designed responsive UI/UX with reusable React components.
- Tech Stack: React.js, Node.js, Express.js, MongoDB, CSS, JavaScript.

2. College Connection Platform (UniLink)

- Developed a web-based platform to connect college students for collaboration, networking, and resource sharing.
- Implemented user authentication, post sharing, and interactive features for real-time communication.
- Built backend APIs using Express.js and MongoDB for secure data management.
- Tech Stack: React.js, Node.js, Express.js, MongoDB, CSS, JavaScript.

3. Couple Connection Platform (Lovenest)

- Created a personalized website to celebrate and manage relationship memories and milestones.
- Integrated photo gallery, love letter section, shared to-do list, audio player, and live relationship timer.
- Focused on responsive and aesthetic UI using Tailwind CSS with backend support for storing memories.
- Tech Stack: React.js, Tailwind CSS, Node.js, Express.js, MongoDB.
